

# UNIVERSAL GREASE

**NOW AVAILABLE**

- > Part Number: 03325215
- > Usage: Central Lubrication System

Despite its' generic name, this high quality universal grease is essential to the smooth running and long life of your crane. Manitowoc have tested many grease products to be able to confidently offer this high performance grease at a very cost effective price.

Primarily used via the built-in central lubrication system, this grease is utilized in:

- The superstructure for the protection of the turntable bearing, boom foot pin and lift cylinder bearings.
- The chassis for the external steering elements of the MegaTrak suspension strut.

Other typical uses are lubrication of the cardan shafts and slewing angle sensor. Don't compromise on regularly using a proven, quality grease to protect these critical elements of the crane and its' operation.

There can be costly consequences .....
